

Photo report V25:

Project WIAP-KFKOK Vietnam,
Start 28.09.2012 / 02.10.2012 Today

Photo 1: After we were allowed to Angola for many solder wire, we have all the teaching line let min. 5 hours. But there are almost 60 apprentices, every 5-10 hours many hours.

Photo 2: The apprentice must now manually all boxes write with sketches of what it is. Here it is fitting.

Photo 3: Our teacher Jerry sits in the vertical lathe and wiring the terminal box. For weeks we were looking for the parts. They learned only good disassembly allowed and good assembly.

Photo 4: A top painting is worth gold. We have a simple painting, but it will get better from week to week.

Photo 5: Student A 24 cover all measuring equipment, all computers. Good work. The boy is Tip Top.

Photo 6: Ups. There comes a backhoe dredging and outside our office window. It is preparing a garden for our apprentices. We want to test tomato cultivation.

Photo 7: Our metal expansion plant shows here for what they can be used.

Photo 8: Our first CNC lathe WIAP DM2S from Vietnam.

Photo 9: Here we've got the A2 apprentice without glasses, which is not good. In the future, there are downsides.

Photo 10: A new C apprentice while filing. Well as in the A3 apprentice instructions are

Photo 11: Here fill the apprentices, how many points they give themselves with the procedures. 20 is the best. 0 points where such disclosures with certain works, this has never been made. And must now be made up in the last year of training.

Photo 12: Here we have some tool that are not stainless. The rust is a big problem in Vietnam, we have to decide, many tools to protect against rust with paint.

Photo 13: Here prepare the trainees to the tools for painting.

Photo 14: Even primed some of the tools.

Photo 15: The new machine bed of the small CNC lathe WIAP dm2_w

Photo 16: The boys are very excited about the interesting work

Photo 17: The loaded in Switzerland container with relief goods came after lengthy negotiations finally to Customs on Tuesday 10/02/2012.

Photo 18: A special task for the boy to learn a technical job and unload relief supplies for the hospital.

Photo 21: Now the skin laser lowered

Photo 19: The driver comes and shows everyone how a bomb is broken.

Photo 22: Even a washing tower came along with sterilizer and ultrasonic and 600 000 face masks.

Photo 20: And once the laser is manually unloaded. We wanted to rent a truck, but with the many hands: It went like lightning.

Photo 23: Even that was fast on the ground, they are actually very busy the Vietnam people.

Photo 24: Yes, with more than 50 apprentices such a job is very fast.

Photo 27: In the beginning, the boys with the pallet trolley transported the many boxes to our halls.

Photo 25: The headmaster Bang Ministry of Agriculture watching as the boys work.

Photo 28: Inside the camp had to learn to give the apprentices, all of the boxes with the text and not standing on the head and all the same store on the same site.

Photo 26: The Vietnam People hate the sun so much that they would rather use the umbrella as a parasol.

Photo 29: After about 2 hours finally came a tractor to help, which facilitated some.

Photo 30: Here the teacher T6, Jacki

Photo 33: But the everyday life at the school continues. Here we make 4 test sites.

Photo 31: By the time we come back in December 12 is not the product to be given away. Then in December, we first view hospitals and decide where we give something.

Photo 35: We have 4 Siemens logo which we use to train.

Photo 32: Sensitive goods are protected with plastic

Photo 36: We build 4 training courses.

Photo 37: In the middle are Student A18 Son, which is proper electrical department head, right next to the A3 him his assistant. And the small B apprentice will later be a successor.

Photo 38: The next trip we have to take 4 Logo cable, then the intensive training set to go.

Photo 39: Being from out of Switzerland some small transformers 230 volts, 24 volts, and have to buy in the market as a rectifier for 1 franc.

We thought we'd try but if we can make own power supplies. That was the start.

Photo 40: The metal housing relaxation facilities are also finished and sprayed.

Photo 41: There is still a lot of work on the ground.

Photo 42: At last, after almost 10 weeks can not be our DM2S also holes in the doors, so

you can install the window. The people have forgotten just because!

Photo 42b: Yes, yes doors on machine tools with no windows!

Photo 42c: The 2nd Cross slide of DM2 S is now being prepared for welding. Moreover, the drawings improved.

Photo 43: Our measuring equipment and medication cabinet gets a better lock

Photo 44: The container was also some goods for Computerraum, the construction. Of course it was again the chief teacher Robinson, who had to control everything.

Photo 45: On 2 last evening before our departure, has invited us the school to eat in the river Blue Star Restaurant

Photo 46: Our coordinator Tung Le Hieu and Director Bang

Photo 49: Farewell party at school. Drinking beer on the last day. Stop school on 14.00 h.

Photo 47: OK, since he has just studied something! Director Bang.

Photo 50: Even director Bang is front left

Photo 48: Here we have initiated with the Vice Director. There was Dalat wine

Photo 51st With discipline the boys sitting there.

Photo 52: toast with each group team leader. Here the A group, 3 Year of training apprentices

electricity for the room, and still have to pay insurance.

Photo 55 Here, the C group, start 1 Year of training apprentices

Photo 53: Here the B group, 2 Year of training apprentices

Photo 56: By by apprentices. Here comes toward us, the apprentice who has almost 400 points and the best thing is to this day. Tomorrow we fly back to Switzerland. On Saturday morning we arrive in Zurich (06.10.2012). On Sunday, 7.10. 2012, going back to Angola for 8 weeks.

Photo 54 Here, the B group, 2 The year of training apprentices Camau apprentices which a former employee of the Red Cross brought to us. Unfortunately, those parents are so poor that we do it for the food, rooms, etc
